Warehouse Drones

AI enabled inventory insights collected by autonomous drones. With Gather AI you can digitize the entire facility. Find specific products, perform spot checks on specific pallets, or locate misplaced inventory - making inventory management faster and more accurate.

Smart Shelf-Tags

Sepioo's digital display shelf tags combine robust, energy-efficient performance with ergonomic, two-way user interaction—perfect for streamlining tasks like picking and reordering. Built for industrial environments, these high-quality displays feature protective glass, multi-color LEDs, and seamless integration, all backed by over a decade of e-Paper innovation.

RFID

Let our team implement RFID into your existing processes, or as a standalone asset tracking tool. Our experienced staff will help take the mystery out of RFID, and guide your decision making when evaluating if RFID is the right technology for your needs.
