PRINTER STANDS

DESIGNED & BUILT BY EMP
STANDARD & CUSTOM

Get label printers off the bench and into a stand built for them. Our printer stands are some of our most popular products: customers love the smooth slides, easy access to printers and the space-saving design.

EASY SLIDE TRAYS

Printer shelves slide out for quick media changes, even in tight spaces where the door can't open.

SMALL FOOTPRINT

Stacking printers cuts the floor space of two printers in half.

BOLTS TO THE FLOOR

Pre-drilled floor mounts make installs quick. Tall stands must be anchored before use.

INDUSTRIAL COATING

A hardened powder coat stands up to harsh environments and wipes clean.

PRINT STATION ADD-ONS

Add a keyboard tray, monitor arm and PC mount for a standalone print station.

LINESIDE STAND NEW

A single-printer pedestal that puts your printer right beside the conveyor or workstation.

BUILD YOURS ONLINE

Pick a standard stand or lay out your own, see it in 3D and request a quote in a few minutes.
